Spray Tan Liability Waiver

DHA reacts with the skin's amino acids resulting in a tan similar looking to that of the sun. The darker you can tan naturally, the darker you can tan with a spray tan. Like most cosmetics, avoid exposure to the eyes, lips, and other parts of the body covered with a mucous membrane. This should be accomplished by following the staff's breathing instructions as to avoid inhaling or ingesting the sunless product and by applying a barrier cream.

Wearing deodorants, lotions or makeup will act as a barrier to the tanning solution, causing an uneven tan and or white spots, so we ask that you do not wear these before spray tanning. Completely exfoliating before applying and re-applying will enhance the results. Do not use any oil-based products, alpha hydroxyl acids and mineral oils as they accelerate skin exfoliation. Please refrain from any activities that will cause perspiration until after your first shower. Your spray tan should last 5-10 days depending on your skin type and how well you take care of your sunless tan. It's very important to keep your skin moisturized after your spray tan, avoiding long baths or showers and hot tubs. Salt water exposure or a chlorinated pool can also shorten your spray tan. Be advised there may be a small percentage of individuals whose skin does not react favorably to spray tanning. Some medications such as birth control pills, hormone replacement medications, or antibiotics may alter your tan. Please consult with your technician if you have any questions.

Following the spray tan session, please avoid tight clothing, excessive perspiring, leather seats and do not shower for at least 6-8 hours. Letting solution stay on overnight without showering is recommended. Some fabrics may be stained by the spray tanning solution, please use caution and care. All ingredients in the product used in this procedure are intended for cosmetic use and generally regarded as safe. There are, however, occasions where individuals may be allergic to one or more ingredients in the spray tan solution. If this occurs, shower and discontinue use. If severe reaction, contact a physician. You may ask to see the ingredients prior to application. Be advised we do NOT advise being sprayed for photographic sessions,

modeling assignments, weddings, etc. unless you have had a trial spray tan. It is my responsibility to inform the tanning technician of any allergies, relevant medical history, or prior adverse reactions to self-tanning products or moisturizers. It is recommended to exfoliate, shave and shower 24 hours before, wax 3 days before, and laser hair removal 2 weeks before your spray tan or 5 days after your spray tan. **WARNING:** This product does not contain a sunscreen and does not protect against sunburn.

I have read the contents of this consent form carefully and state that I am not aware of any medical conditions, allergies, or other reasons that would prohibit me from sunless tanning. I have been given adequate instructions for the proper use of the sunless application, understand the risks involved, and use it at my own risk. In consideration of spray tanning services provided by Re-form Physical Therapy and Pilates, LLC, I hereby waive, release, hold harmless, and forever discharge Re-form Physical Therapy and Pilates, LLC, of and from all claims, demands, debts, contracts, expenses, causes of action, lawsuits, damages, and liabilities of every kind, whether known or unknown, from or related to my use of Re-form Physical Therapy and Pilates, LLC spray tanning services. I hereby assume any risks associated with the spray tanning services provided under this Agreement and Release. I hereby agree to release the owners and operators from any damages that I might incur from spray tanning.

I have read the above statement and answered all questions to the best of my knowledge.
